SPACE SERIES

SPEAKERPHONES
FOR HYBRID WORKING

CREATE THE AMAZING

beyerdynamic

A speakerphone is a mobile combination of hands-free solution and loudspeaker.

WHAT IS A SPEAKERPHONE?

The beyerdynamic speakerphones are not only the perfect everyday companions for dynamic employees, they are also the ideal meeting solutions for businesses, agencies and start-ups.

For decades, beyerdynamic has been known for excellent sound quality. This expertise has also been put to use in the beyerdynamic SPACE series.

Thanks to the combination of innovative microphone technology and high-quality loudspeaker system,

the beyerdynamic SPACE series offers both optimal speech intelligibility and renowned reference sound – whether in huddle rooms, small to large meeting rooms, as a travel companion on business trips or as a multimedia device for presentations.

Further features such as a Kensington lock, antibacterial textile, the Business Mode for secure Bluetooth® pairing, and an optional USB WL Adapter are tailored to companies' needs today.

MAXIMUM APPLICATION FLEXIBILITY

- Personal speakerphone for single office
- Conference solution for huddle rooms
- Conference solution for small to large meeting rooms
- Multimedia device for perfect sounding presentations
- Travel companion on business trips

360° SMART MIC TECHNOLOGY

OPTIMAL SPEECH INTELLIGIBILITY FOR DAY-TO-DAY BUSINESS

This is what many years of microphone development expertise come down to: With the innovative 360° SMART MIC TECHNOLOGY, the beyerdynamic SPACE series offers maximum freedom of movement for meetings with up to six participants. With a maximum distance of 2.5 meters between the speaker and **beyerdynamic SPACE** or **beyerdynamic SPACE MAX**, also larger groups can make use of space, depending on the size of the room and the table situation. The microphone system features four MEMS microphones.

Thanks to modern beamforming technology and state-of-the-art signal processing, it automatically recognizes whether the incoming sounds are voices or background noise and blanks out undesirable reverb, echo and feedback.

This way, the implemented echo cancellation sets a new benchmark. On top of that, **beyerdynamic SPACE** or **beyerdynamic SPACE MAX** automatically adjusts the volume of voices, ensuring the conversation is always harmonious.

Full-Duplex allows participants to speak simultaneously and still be heard, without dropouts or cut offs.

2.5 m

BEYERDYNAMIC SPACE

PERSONAL SPEAKERPHONE FOR HOME OFFICE, HUDDLE ROOMS AND BUSINESS TRIPS

beyerdynamic SPACE is the perfect companion when working from home, in the personal office or on business trips. The personal speakerphone is ideal for telephone calls and offers excellent speech intelligibility and first-class sound. When it comes to aesthetics, the personal speakerphone is also a true highlight – with its high-quality textile and colouring, it blends in perfectly in any environment.

Thanks to the compact form factor and its long battery life of up to 20 hours, **beyerdynamic SPACE** offers the best possible flexibility when you quickly need to change your location.

This makes the personal speakerphone ideal for business trips. With its integrated Kensington lock and handy software features, **beyerdynamic SPACE** is a true enrichment for everyday life in the office and can be used in single offices, huddle rooms and small meeting rooms with up to 4 participants alike.

BEYERDYNAMIC REFERENCE SOUND

Excellent sound quality
reproducing voices

360° SMART MIC TECHNOLOGY

- Great speech intelligibility
- Unwanted reverb, echoes and feedback are immediately suppressed

AWARD-WINNING DESIGN Red Dot Design Award 2022

reddot winner 2022

AN EYE-CATCHER IN ANY SPACE

Backlit LED-Panel and
IP64 certification against
dust and splash water

WIDE-RANGING PLATFORM COMPATIBILITY

Zoom certified and compatible
with all common UC platforms
like Microsoft Teams®

zoom Certified

IDEAL FOR COMPANIES

- Business Mode and Kensington lock
- Easy Firmware updates via beyerdynamic Update Hub

MEETS THE DEMANDS OF EVERYDAY LIFE

- 20 hours battery runtime
- Compact, packed up quickly, even for on the go

CONNECTED IN A CLEVER WAY

Via Bluetooth®
or USB

YOUR ADVANTAGES AT A GLANCE

BEYERDYNAMIC SPACE MAX

SPEAKERPHONE FOR MEDIUM TO LARGE MEETING ROOMS, HUDDLE ROOMS AND INDIVIDUAL OFFICES

The speakerphone **beyerdynamic SPACE MAX** is especially suitable for medium to large meetings, huddle rooms and personal offices for meetings with up to six participants.

The centerpiece is the high-quality loudspeaker system, which offers an outstandingly detailed sound with powerful bass and clear trebles when reproducing speech, media, but also music.

With the help of the optionally available **Cascade Cable SPACE MAX**, two **beyerdynamic SPACE MAX** devices can be connected for a bigger hands-free system with up to 12 participants. This convenient option makes **beyerdynamic SPACE MAX** the perfect and flexible companion for hybrid work.

beyerdynamic SPACE MAX offers the best speech recording and maximum sound quality within the beyerdynamic SPACE series. Additionally, it offers a battery life of 25 hours and an integrated Power Delivery fast-charging and powerbank function.

And this is still not all that it has to offer: Thanks to its award-winning design, it is a visual highlight in any environment too.

MAXIMUM SOUND QUALITY

High-quality sound in
voices, media and music

360° SMART MIC TECHNOLOGY

- Great speech intelligibility
- Unwanted reverb, echoes
and feedback are
immediately suppressed

AN EYE-CATCHER IN ANY ROOM

Backlit LED-Panel and
IP64 certification against
dust and splash water

MASTERS EVERY MEETING

Expandable for large meetings
(up to 12 people in a room) with the
optional Cascade Cable SPACE MAX,
Business Mode and Kensington lock

EXTENSIVE PLATFORM COMPATIBILITY

Zoom certified and compatible
with all common UC platforms
like Microsoft Teams®

CONNECTED IN A FAST AND CLEVER WAY

Via Bluetooth®
or USB

MORE POWER FOR EVERYDAY WORK

- 25 hours battery runtime
- Power delivery fast-
charging function and
powerbank mode

EASY FIRMWARE UPDATES

Via the beyerdynamic
Update Hub

beyerdynamic SPACE MAX

YOUR ADVANTAGES AT A GLANCE

USB WL ADAPTER

With the optionally available **USB WL Adapter**, you always have a quick and wide-ranging Bluetooth® connection between **beyerdynamic SPACE** or **beyerdynamic SPACE MAX** and laptop or PC. The **USB WL Adapter** enables full functionality and compatibility for conducting phone calls and meetings via Microsoft Teams®.

Only for
beyerdynamic
SPACE MAX

CASCADE CABLE SPACE MAX

The optionally available **Cascade Cable SPACE MAX** allows the extension of conference scenarios. With the cable, two **beyerdynamic SPACE MAX** devices can be connected to each other and a big conference scenario with up to 12 participants in the room can be realised.

WORK & LEARN

No matter whether digital seminar or workshop, virtual lectures or lessons – pupils, students and educational institutions are increasingly turning to virtual learning and knowledge transfer. **beyerdynamic SPACE** or **beyerdynamic SPACE MAX** is a reliable companion in these situations.

beyerdynamic SPACE or **beyerdynamic SPACE MAX** enables e.g. teachers, professors or seminar leaders to hold their lessons or lectures from the comfort of their own home – with optimum sound quality and maximum freedom of movement.

But even on site, **beyerdynamic SPACE** or **beyerdynamic SPACE MAX** makes for a flexible multimedia device that will make sure that presentations, lessons and seminars are delivered with optimum sound quality.

BEAMFORMING

When using beamforming, the speakerphone selects the desired audio signals, such as voices, and eliminates interfering signals such as fans due to intelligent signal processing.

CONFERENCE CASCADE MODE

The Conference Cascade mode can be used when one **beyerdynamic SPACE MAX** is not sufficient for the participants of a conference scenario. To expand a conference scenario, the Conference Cascade mode can be used by connecting two **beyerdynamic SPACE MAX** with the optionally available **Cascade Cable SPACE MAX**. The Conference Cascade mode will adapt and synchronise the microphones and loudspeakers.

DONGLE

A dongle is a small USB stick that enables certain functions together with another device. For example, computer keyboards or computer mice are often used for a wireless connection with a dongle. The same applies to **beyerdynamic SPACE** and **beyerdynamic SPACE MAX**. The dongle enables excellent remote compatibility with communication platforms such as Microsoft Teams® via Bluetooth®.

ECHO CANCELLATION

When using a full-duplex speakerphone, it does not only pick up the voices of the participants, but naturally also the echo of its own loudspeaker during the playback of audio signals. To eliminate this echo signal, the so-called echo cancelling is used.

FULL-DUPLEX-AUDIO

Thanks to full-duplex, audio signals are transmitted in both directions allowing participants to speak and be heard at the same time which results in a harmonious conversational atmosphere.

HUDDLE ROOM

A huddle room is a small meeting room where normally meetings with a maximum of six people can take place. Usually, the rooms have been optimised for video telephony and are suitable for both spontaneous and planned meetings.

IP CERTIFICATION

The IP certification states the type of protection of technical devices against external influences and dirt.

KENSINGTON LOCK

The Kensington lock is a mechanical anti-theft protection for securing notebooks, laptops or even speakerphones. It uses a wire rope which can be attached to the hardware device provided for this purpose.

MEMS MICROPHONES

MEMS microphones are space-saving microphones that can be used directly on electrical circuit boards. This makes them ideal for use in compact devices such as **beyerdynamic SPACE** and **beyerdynamic SPACE MAX**. MEMS means Micro Electro Mechanical System.

POWER DELIVER**FAST-CHARGING FUNCTION**
beyerdynamic SPACE MAX

includes a fast-charging function according to the Power Delivery Standard. This standard can be met by using a power adapter that supports the Power Delivery Standard.

POWERBANK MODE

Portable devices such as smartphones are essential in today's business environment. It is a convenient additional function of **beyerdynamic SPACE MAX** that it can also be used as a powerbank. During a meeting, you can plug your smartphone into the power output port to charge it.

SPEAKERPHONE

A speakerphone is a mobile combination of a hands-free solution and loudspeaker. It is used for phone calls and meetings via communication platforms such as Microsoft Teams® or Zoom, or for phoning with a smartphone.

beyerdynamic SPACE and **beyerdynamic SPACE MAX**

are also ideal for music playback thanks to the high-quality speaker system.
